International application No. PCT/JP2005/002063

Box No	o. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This in	ternational search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box No.	. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
The devi	ernational Searching Authority found multiple inventions in this international application, as follows: einventions of claims 1, 2, 5, 14, 25 relate to a transmitter (a communication ice, a data transmitting method) for specifying antennas by remote control. einventions of claims 3, 15, 26, 29 relate to a transmitter (a communication ice, a data transmitting method) for transmitting data by specifying enhas one by one when a predetermined instruction is given. The inventions claims 7, 8, 16, 27 relate to a receiver (a communication device, a data eiving method) for specifying antennas by remote control. The inventions claims 9, 11, 13, 17, 28, 30, 31 relate to a receiver (a communication ice, and a data receiving method) for receiving data by specifying antennas by one (Continued to extra sheet) As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark	on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

International application No. PCT/JP2005/002063

Continuation of Box No.III of continuation of first sheet(2)

when a predetermined instruction is given. The inventions of claims 4, 6, 10, 12, 18-20 relate to a radio communication system (a transmitter, a receiver) comprising a transmitter and a receiver. The inventions of claims 21-24 relate to the examination step time of a radio communication system comprising a transmitter and a receiver each having antennas in an anisotropic positional relation.
